### **Conclusion**

3. The prior art of record and not relied upon is considered pertinent to Applicants disclosure.

Pang et al (US Patent 6,546, 375) teaches apparatus and method of pricing financial derivatives.

Nordin et al (US 6, 128, 607 Patent) teaches computer implemented machine learning method and system.

Krongold et al (US 6, 400, 773 Patent) teaches section division operation method for multi carrier communication system.

4. Applicant's claims 1, 15, 17, states " configuring a handler to monitor, configuring said handler to send, utilizing said descriptor file to monitor, handler configured to monitor, configured to copy, configured to transmit "

However the subject matter of a properly construed claim is defined by the terms that limit its scope. It is this subject matter that must be examined. As a general matter, the grammar and intended meaning of terms used in a claim will dictate whether the language limits the claim scope. Language that suggests or makes optional but does not require steps to be performed or does not limit a claim to a particular structure does not limit the scope of a claim or claim limitation. The following are examples of language that may raise a question as to the limiting effect of the language in a claim:

- (A) statements of intended use or field of use,
- (B) "adapted to" or "adapted for" clauses,
- (C) "wherein" clauses, or
- (D) "whereby" clauses.

Cir. 1997). Limitations appearing in the specification but not recited in the claim should not be read into the claim. Cir. 2003) (claims must be interpreted "in view of the specification" without importing limitations from the specification into the claims unnecessarily). In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-551 (CCPA 1969). See also In re Zletz, 893 F.2d 319, 321-22, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989) ("During patent examination the pending claims must be interpreted as broadly as their terms reasonably allow.... The reason is simply that during patent prosecution when claims can be amended, ambiguities should be recognized, scope and breadth of language explored, and clarification imposed.... An essential purpose of patent examination is to fashion claims that are precise, clear, correct, and unambiguous. Only in this way can uncertainties of claim scope be removed, as much as possible, during the administrative process.").<
